

Research Areas: Bioengineering
Catalysis & Reaction Engineering
Electronic Materials
Energy & Environment
Polymers & Soft Materials
Theory & Simulations
Systems & Control

study Chemical & Biomolecular Engineering

at the **University of California, Berkeley**

The Chemical & Biomolecular Engineering Department at the University of California, Berkeley, one of the preeminent departments in the field, offers graduate programs leading to the Doctor of Philosophy, Master of Science or Professional Master's of Science in Product Development (PDP).
